PROFILE

Highly motivated and detail-oriented Python developer with a focus on backend development and a strong foundation in computer science and programming principles. Experienced in developing efficient software solutions, with a focus on delivering high-quality code. Also possess strong problem-solving skills, a passion for learning new technologies, and comfortable working independently or collaborating with cross-functional teams to deliver innovative solutions that meet client requirements.

WORK EXPERIENCE

IT Help Desk (Part time)

RCCG Divine Masterpiece

2023 - Present

- Ensure smooth running of operations from the IT and technical aspects.
- Monitor, report and prevent the occurrence of security events.
- Ensure the organisation is keeping pace with changes in technology, and assist with maintenance and update services as required.
- Developed web solutions where required to enhance quality and efficiency.
- Work with a highly skilled like-minded team to deliver security-level support for a range of technologies.

Experienced Analyst

KPMG Nigeria

2021 - 2023

- Designed and developed an E-Learning Application Prototype which led to the development of a skill-retention knowledge bank.
- Successfully led a team and worked within a team on numerous sustainability-related projects and engagements across different industries, where my tech background was instrumental.
- Provided IT and technical support which enhanced the performance and efficiency of my team.
- Assisted with preparation of documents, reports and presentations using Microsoft Word, Excel, PowerPoint, and other mainstream software.

Intern, Software Developer

The Vace717

2020 - 2021

- Learned about SDLC practices and working in an Agile work environment.
- Assisted experienced software engineers in successfully coding, debugging and testing software applications and patches.
- Successfully collaborated with team members to develop new software.
